

Chenming Seal-Spring Type-2024

Type Code	Profile DWG	Sealing Direction	Material	Used In	Recommended Applications
O		Rotary	PTFE/SS304/316L	SVL, SSL, TC, SC	O-shaped springs provide spring load within a medium compression range, used in rubber oil seal, PTFE SEAL VA1J.
U		Rod & Rotary	PTFE/SS304/316L	UFI , UFA , URB , UBI , UBA , FFV , RSV , RSM	U-shaped springs provide a wider spring load and larger compensation capacity, used in Rod/Piston seals.
S		Rod & Rotary	PTFE/SS304/316L	SRI , SRA , FFS , RSS	S-shaped spring can provide stable spring load, low friction and long-term sealing within a large compression range.
C		Rod/Piston /Static	PTFE/SS304/316L	CRB , UCI , UCA , FBC , RSC	C-shaped spring can provide a large spring load within a small compression range, and is suitable for static gas sealing or ultra-low temperature sealing.
